

1. Introduction: The data file layout for STAAR and STAAR EOC is of increased importance since we have to convert scale scores to a numeric grade and add this to the students final grade. Many districts are also working on database systems to track STAAR & STAAR EOC progress. Normally the release of this file is held off by the state until late spring, to insure that it is in final format. Some districts feel that getting a preview of that file in the fall might allow them to better plan for the actual arrival of the state data file. Question: Would you encourage the state to release a "Preliminary" file layout, with the understanding that corrections or additions might occur?

		Response Percent	Response Count
Yes- We encourage a Preliminary Release of the file format.		92.9%	248
No – We would rather wait for the final format.		7.1%	19
